

Amr Khaled Abozeid

AI Engineer & Front-End Developer | React, AI APIs & Real IoT Hardware

Mansoura, Egypt | +20 100 845 4029 | amrk78420@gmail.com
GitHub: github.com/byAmrkhaled0 | LinkedIn: linkedin.com/in/amr-khaled-0a58822a4

Professional Summary

Computer & Artificial Intelligence graduate focused on building polished front-end products, AI-connected dashboards, backend API integrations, and real IoT hardware workflows. Strong practical experience through live client websites and Ecosense AI, a smart plant-health graduation product using React, Flask APIs, image analysis, ESP32-CAM, and real sensor readings.

Core Skills

- **Frontend:** React, JavaScript, responsive UI, RTL/LTR, accessibility basics, component-based design
- **Backend/API:** Python, Flask, REST APIs, JSON response handling, frontend-backend integration
- **AI:** Machine learning concepts, image-based analysis flow, NLP foundations, model API usage
- **IoT Hardware:** ESP32-CAM, DHT11, soil moisture sensor, light/LDR sensor, hardware wiring
- **Deployment:** Git, GitHub, Vercel, performance optimization, SEO metadata, schema markup

Certifications

- AWS Academy Graduate - Cloud Foundations
- AWS Academy Graduate - Machine Learning for Natural Language Processing
- Artificial Intelligence & Machine Learning - ITI, 72 hours
- Intro to Deep Learning - Kaggle
- Computer Vision - Kaggle
- Getting Started with Deep Learning - NVIDIA

Featured Projects

Ecosense AI - Smart Plant Health System

Graduation project combining React frontend, Flask AI backend APIs, plant image diagnosis, real hardware sensors, ESP32-CAM camera flow, and dashboard output. Worked on frontend experience, API integration, real hardware track, sensor flow, and team delivery.

Dr. Ashraf El Abd - Fitness Platform

Production website for a fitness brand with service structure, conversion-focused CTAs, SEO, and responsive design.

7Day Gym / El Nawras / El Sobky Charity

Live business and community websites with Arabic UX, responsive layout, service presentation, and contact conversion paths.

Technical Strengths

- Building clean React UI with professional visual hierarchy.
- Connecting frontend screens to backend AI endpoints.
- Handling real sensor data and hardware project flow.
- Optimizing images, SEO tags, metadata, and web performance.
- Delivering bilingual and multilingual website experiences.

Ecosense AI Hardware

- ESP32-CAM workflow for plant image capture.
- DHT11 temperature and humidity sensor.
- Soil moisture sensor and light/LDR readings.
- Real hardware wiring connected to AI + web dashboard flow.

Education

Sadat University - Faculty of Computers and Artificial Intelligence

Computer & Artificial Intelligence Graduate

Portfolio Focus: Frontend + AI backend integration + real IoT hardware + production websites.

Languages

Arabic: Native | English: Good professional working level
